PROFESSIONAL SUMMARY

Results-driven Data Analyst and ML Developer (B.Sc. Data Science, 8.96 CGPA, University Rank Holder) with hands-on industry experience in ETL pipelines, business intelligence dashboards, Python programming, and end-to-end ML model development. Built and deployed production projects including a multi-disease prediction system (87%+ accuracy) and a Flask-based attendance platform with API automation. Proven ability to translate complex data into actionable insights for both technical and non-technical stakeholders. Actively seeking roles in Data Analytics, Software Development, or Tech Support Engineering.

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java, JavaScript, HTML5, CSS3

Data Science & ML: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering, ETL Pipelines, Data Wrangling, Statistical Analysis, Regression, Classification, Clustering, Model Deployment

Frameworks & Tools: Flask, Streamlit, OpenCV, REST API, Git & GitHub, VS Code, Jupyter Notebook, PyCharm

BI & Visualization: Microsoft Power BI, Tableau, Excel (Advanced), Dashboard Design, Business Intelligence

Cloud & DevOps: AWS S3, AWS EC2, Linux CLI

Databases: MySQL, SQLite

Soft Skills: Analytical Reasoning, Client Communication, Team Collaboration, Agile Workflows, Technical Training, Time Management

WORK EXPERIENCE

Data Analyst Intern | Intuitive Technosys (I.T Computer Education)

Jul 2025 – Dec 2025

Vaniyambadi, Tamil Nadu

- Built and maintained ETL pipelines using Pandas, NumPy, and Seaborn across 6+ datasets; data wrangling and statistical analysis uncovered trends that reduced manual data-prep time by ~30%.
- Designed and published interactive Power BI business intelligence dashboards tracking 5 KPIs for senior stakeholders, replacing weekly Excel reports with real-time visualizations.
- Applied SQL and Python to clean, merge, and validate multi-source datasets; identified and corrected ~15% data inconsistencies, improving downstream model accuracy.
- Delivered 3 client-facing insight reports as part of a 4-member analytics team, receiving positive feedback for clarity and actionable recommendations.

Technical Trainer | Intuitive Technosys (I.T Computer Education)

Jul 2022 – Jun 2025

Vaniyambadi, Tamil Nadu

- Designed and delivered structured training programs in Python, C, C++, and Java for 50+ students and working professionals across 4 cohorts, achieving an average satisfaction score of 4.6/5.
- Created comprehensive course modules including assignments, live coding sessions, and mini-project evaluations, reducing course prep time by 20% in subsequent cohorts.
- Mentored students through debugging, algorithm design, and real-world project development; 90%+ of mentored students successfully completed their capstone projects.
- Simplified complex programming concepts for beginners through client-facing technical communication — directly transferable to Tech Support and stakeholder-facing IT roles.

PROJECTS

Med-Predict — ML-Powered Disease Detection System github.com/jawwadahnaf/med-predict

Tech Stack: *Python, Scikit-learn, Streamlit, Pandas, NumPy, FPDF*

- Built a multi-disease prediction system (Diabetes, Heart Disease, Parkinson's) using SVM, Naive Bayes, and Random Forest; achieved 85–92% accuracy across classifiers on benchmark datasets.
- Deployed a Streamlit web interface enabling non-technical users to input symptoms and receive instant diagnostic reports with auto-generated PDF prescriptions via FPDF.
- End-to-end model deployment pipeline covering data wrangling, feature engineering, training, evaluation, and production-ready web interface.

Smart-Presence — Flask-Based Attendance Management System github.com/jawwadahnaf/smart-presence

Tech Stack: *Python, Flask, SQLite, HTML/CSS, JavaScript, REST API*

- Architected a full-stack web application using Python Flask with separate secure portals for faculty and students, real-time attendance tracking, and role-based access control.
- Integrated automated WhatsApp notifications via REST API to instantly alert absent students, eliminating 100% of manual follow-up messages.
- Deployed on a local server handling 100+ student records with sub-second response times.

EDUCATION

B.Sc. Data Science

2022 – 2025

Islamiah College (Autonomous), Vaniyambadi • CGPA: 8.96 • University Rank Holder • Graduated with High Proficiency

H.S.C (Higher Secondary)

2021 – 2022

Islamiah Boys Higher Secondary School, Vaniyambadi • 79%

CERTIFICATIONS

- The Complete Python Bootcamp: Zero to Hero — Udemy (Completed: 2023)
- AWS Cloud Computing Essentials — Amazon Web Services (Completed: 2024)
- Ultimate AWS Certified Cloud Practitioner CLF-C02 — In Progress (Expected: Q3 2026)

ACHIEVEMENTS & ACTIVITIES

- University Rank Holder — Graduated with 8.96 CGPA in B.Sc. Data Science (Top of department).
- 2nd Prize, AYINA 2023 — Annual Young Innovative Nurture Awards, Islamiah College; awarded for project innovation and technical excellence.
- Department Secretary — Elected secretary for both BCA and Data Science departments; managed academic events and student coordination.
- Recognized for Excellent Academic Performance every semester throughout the B.Sc. program.
